

Students

Exemptions from Attendance

Children may be exempted from county office programs only under those specific circumstances which are described in the Education Code.

It is the desire of the county board that every student in this county who is needy and meets the established requirements, should participate in county office programs and that no exemptions be made without verification of the facts in each case. Presentation of satisfactory evidence will be required for those students suffering from mental or physical conditions which prevent or make inadvisable their participation in county office programs.
