Work Experience Education Opportunities

It is the intent of the county board to promote work experience education opportunities within the county office that will offer pupils instruction in the skills, attitudes and understandings necessary for success in employment.

Appropriate guidance and supervision procedures will ensure maximum educational benefit to students as they obtain work experience education in administrative services, business services, or instructional support services.

Students enrolled in such work experience education shall not displace regular full-time employees. The work experience education available within the county office will not involve apprenticeship occupations.
