

Students

Accidents

Although every reasonable effort is made by the county office to prevent accidents to students, it is inevitable that accidents will occur. The superintendent shall develop regulations and procedures which will make sure that prompt action will be taken to minimize the effects of the injury, provide first aid and/or medical attention as quickly as possible, to notify parents of the accident as quickly as possible, and to take whatever other steps are deemed necessary in the interest of the pupil.

A complete accident report shall be made by the certificated staff member under whose supervision the accident occurs, unless the staff member believes that the injury received by the pupil is trivial and represents no threat to the pupil's well-being.
